

EPIC: Secure Login for Spartans Gaming App

- Business Goal: Enable players to access their accounts securely and quickly, meeting regulatory requirements and preventing fraud.
- Business Value: Increase signup-play conversion, reduce churn due to login friction, and mitigate risks.
- Primary Scope: Email/password authentication.

Summary

As a registered player I want to log in with my credentials, so that I can securely access my account, balance, and games.

Description

- Login flow with visual validations and clear messages.

Acceptance Criteria (Gherkin-style)

1) Successful login

- Given an user have an active and verified account
- And the user enter a valid email and the correct password
- When the user confirm login
- Then the user log in the application successfully

Test Cycle: LOGIN (Spartans App)

- Objective: Validate secure login flow end-to-end (email/password)

Test Case: Ensure that the user login in the app successfully.

Given the user clicks on the LOGIN button

And the user complete the EMAIL and PASSWORD fields

When the user clicks on LOGIN button on the modal

Then the user should log in the app successfully
