

EPIC: Search Bar for Spartans Gaming App

- Business Goal: Enable players to access their favorite games doing a quick search writing the name of the game inside in a search bar.
- Business Value: Make easier for the user to find your favorite game, reduce the number of games on the screen.
- Primary Scope: Search bar feature implementation.

Summary

As a registered player I want to search the game that I'd like to play, So that I can easily find the game banner and click to play.

Description

- Search flow with visual validations and clear messages.

Acceptance Criteria (Gherkin-style)

1) Successful search

- Given an user is logged into the app
- And the user enter a valid game name on the search bar
- Then the app should be load the game banner as expected

Test Cycle: SEARCH BAR (Spartans App)

- Objective: Validate search bar flow end-to-end (game name search)

Test Case: Ensure that the search bar feature is working correctly.

When the user type a valid game name on search bar

Then the user should see expected game banner on the screen

Enter valid credentials

- Action: Search for games = Roulette
