

EPIC: User Balance in Spartans Gaming App after a lost transaction

- Business Goal: Enable players to see their balance securely and quickly, after lost a transaction, ensuring for the users that their balance are correct, preventing balance issues.
- Business Value: Increase player confidence in the platform, and mitigate risks.
- Primary Scope: Balance content feature implementation.

Summary

As a registered player I want to see my balance after a lost transaction, So I can securely see the correct amount of balance lost that I had.

Description

- Balance flow with visual validations.

Acceptance Criteria (Gherkin-style)

1) Balance content in a lost transaction

- Given an user lost a transaction
- When the user see your updated balance content
- Then the app should be show the correct amount o balance

Test Cycle: BALANCE COMPONENT (Spartans App)

- Objective: Validate balance content flow end-to-end (balance component)

Test Case: Validate if the balance component is updated correctly after a lost transaction

When the user lost a transaction

And the user back to the main screen

Then the user should see your balance content updated with the correct value
